

WG25 Closing the marine commons as a tool of resource governance: Inevitable developments and alternative solutions

Organizer

Niels Einarsson

WG25_1: Closing the marine commons as a tool of resource governance: Small-scale fishing

May 24, 9:10–10:30 Room 5

Job satisfaction in Icelandic small-boat fisheries

Catherine Chambers, cat@mail.holar.is

Blönduós Centre of Research and Collaboration Iceland

Hólar University College, Iceland

Enclosure and “pots” in marine resource management systems: Icelandic experiences

Emilie Mariat-Roy, mariatemilie@gmail.com

Ecole des Hautes Etudes en Sciences Sociales/CETMA-MNHN, France

Existential Fisheries Dependence: Remaining on the Map through Fishing

Kristen Ounanian, k.ounanian@gmail.com

University of Rhode Island, USA

Aalborg University, Denmark

Territoriality, Scale and Power: Local responses to system changes in Swedish Fishery Management

Ida Wingren, ida.wingren@ism.lu.se

Lund University, Sweden

WG25_2: Closing the marine commons as a tool of resource governance: Social impacts

May 24, 10:40 - 12:20 Room 5

Resisting the inevitable collapse? - Recovery and adaptation of marginal Saami fisheries communities

Einar Eythórsson, ee@niku.no

Ragnar Elias Nilsen

Norwegian Institute for Cultural Heritage Research, Norway

Stories of resistance. A study of mobilizing place narratives in a countercurrent fishing village

Anniken Førde, anniken.forde@uit.no

Trond Waage, trond.waage@uit.no

University of Tromsø - The Arctic University of Norway

What is the societal role of Greenlandic fisheries? Greenlandic public opinion on quota management and identity

Rikke Becker Jacobsen, rbj@ifm.aau.dk

Aalborg University, Denmark

Greenland Climate Research Centre, Greenland

WG25_3: Closing the marine commons as a tool of resource governance: Property rights, economics, and legal issues of limited entry

May 24, 15:00 - 16:20 Room 4

Hooked on markets: coastal fisheries in the culture of liberal rural capitalism

Alexander Dobeson, alexander.dobeson@soc.uu.se

Uppsala University, Sweden

Fishing rights and financial capitalism in the Arctic: From common property to private ownership assets

Niels Einarsson, ne@svs.is

Stefansson Arctic Institute, Iceland

Evolution of distribution of quotas in Icelandic fisheries, 1984 to 2014

Thorolfur Matthiasson, totimatt@hi.is

University of Iceland

It is all about the 'T' – Trajectories of Icelandic fishing villages in times of transferable quotas

Matthias Kokorsch, mak31@hi.is

University of Iceland
